

TABLE OF CONTENTS

0. Executive Summary	11
1. Introduction to Animal Biotechnology	13
Introduction.....	13
Historical evolution of animal biotechnology	13
Basics of biotechnology	14
DNA	14
RNA	14
Genes.....	15
Single nucleotide polymorphisms	15
Copy number variations in the genome	15
DNA sequences.....	16
Gene expression	16
Gene regulation	17
Proteins	17
<i>Functions of proteins</i>	<i>17</i>
<i>Recombinant proteins.....</i>	<i>18</i>
Monoclonal antibodies	19
Animal genetics	19
Molecular genetics.....	19
Twinning in cattle.....	20
Pig genetics.....	20
Genetic studies in dogs	20
Animal genomics.....	20
The mouse genome	20
The dog genome	21
<i>Sequencing of the dog genome</i>	<i>21</i>
<i>Comparison of genomes of healthy and diseased dogs.....</i>	<i>23</i>
<i>Analysis of DNA copy number variation</i>	<i>23</i>
The cat genome.....	24
Marsupial genomes	24
Genomes of non-human primates	24
<i>Chimpanzee genome</i>	<i>24</i>
<i>Genome of the rhesus macaque.....</i>	<i>25</i>
Livestock genomics	25
<i>Bovine genome.....</i>	<i>26</i>
<i>Bovine SNP map</i>	<i>27</i>
<i>Pig genome</i>	<i>27</i>
<i>Horse genome</i>	<i>29</i>
<i>Sheep genome.....</i>	<i>29</i>
Chicken genome	30
Turkey genome.....	30
Salmon genome.....	31
Priority genome list of the National Human Genome Research Institute	32
Animal proteomics	32
Applications of proteomics in animals	33
<i>Caseins in goat milk</i>	<i>33</i>
<i>Lactic acid bacteria.....</i>	<i>33</i>
<i>Applications of proteomics in animal healthcare</i>	<i>34</i>
Antigenomics.....	34
Bioinformatics.....	34
Nanobiotechnology and animal health	35
Biomarkers and animal health	36
Recombinant protein manufacture.....	36
Animal biotechnology in relation to other technologies	36
2. Application of Biotechnology in Animals	39
Introduction.....	39
Applications of animal genomics.....	39
Genomics of disease resistance.....	39
Statistical genomics to improve breeding	40
Chicken breeding based on genomics	40
Bovine ankyrin 1 gene and beef tenderness	40
SNPs and longevity in dairy cattle	41
Share genomic data to improve cattle breeding programs	41
Genetic engineering	41
Livestock improvement by genetic engineering	41

Disease control by genetic engineering	42
Limitations and precautions for genetic engineering	42
Transgenic animal technology	42
Cloning animals	43
<i>Nuclear transfer technology</i>	44
<i>Nuclear bisection for cloning</i>	45
<i>Zona-free cloning method</i>	45
<i>Abnormalities in cloned animals</i>	46
<i>Cloning from embryonic cells</i>	47
<i>Cloning of rabbits</i>	47
<i>Cloning the rat</i>	48
<i>Cloning the horse</i>	48
<i>Cloning the cow</i>	48
<i>Cloning the dog</i>	49
<i>Cloning in primates</i>	49
Retrovector-mediated production of transgenic animals	49
Episomal vector-mediated gene delivery	50
Sperm-mediated gene transfer	50
Lentiviral transduction of male germ-line stem cells	51
Lentiviral transgenesis	52
Transgenic pharmaceuticals	52
Proteins from the milk of transgenic animals	52
Advantages of milk as source of transgenic proteins	53
<i>Therapeutic proteins from rabbit milk</i>	54
<i>Recombinant human antibodies from cows</i>	55
<i>Therapeutic proteins from goat milk</i>	55
Chicken transgenesis for the production of biopharmaceuticals	56
Concluding remarks about production of recombinant proteins in animals	56
Companies involved in production of transgenic pharmaceuticals	56
Transgenic food products	57
Milking genetically modified cows	57
Transgenic fish	57
Cloned animals as sources of milk and meat	58
Animal feeds from transgenic plants	58
Transgenic modification of plants to increase nutritional value of animal feeds	59
Transgenic disease models	59
Technologies to create transgenic disease models	59
<i>Gene manipulation techniques</i>	59
<i>Embryonic stem cells for gene targeting</i>	60
<i>Homologous recombination</i>	60
<i>Animal models of human diseases</i>	61
Transgenic models for studying human drug metabolism and toxicity	61
The Human Genome Project and the role of transgenics	62
Genomic and proteomic analyses of transgenic animal models	62
Concern about health and welfare of transgenic animals	63
Safety of transgenic technology	63
Concluding remarks about use of transgenic animals	64
RNA interference technology	64
RNAi versus antisense	64
Applications of RNAi in animal biotechnology	64
Xenotransplantation	65
Pigs for xenotransplantation	65
<i>Genetically engineered pigs for transplants</i>	66
<i>Risks of xenotransplantation</i>	66
World Health Organization and xenotransplantation	67
Ethical aspects of animal biotechnology	67
3. A Biotechnology Perspective of Animals Diseases	69
Introduction	69
Infections in animals	69
Viral infections	70
<i>Avian influenza</i>	70
<i>Animal surveillance of influenza</i>	72
<i>Animal biotechnology implications of H1N1 influenza</i>	73
<i>Animal corona viruses and human SARS</i>	74
<i>Avian coronavirus</i>	74
<i>Bluetongue virus</i>	75
<i>Canine parvovirus</i>	75
<i>Classical swine fever</i>	75
<i>Developing new treatments against FMD</i>	75
<i>Equine infectious anemia</i>	76

<i>Foot-and-mouth disease</i>	77
<i>Porcine reproductive and respiratory syndrome virus</i>	78
<i>Rabies</i>	79
<i>Rinderpest</i>	79
Bacterial infections	80
<i>Bovine tuberculosis</i>	80
Mycoplasmal pneumonia	80
Protozoal infections	80
<i>Coccidiosis</i>	80
<i>Neosporosis</i>	81
<i>Toxoplasmosis</i>	81
<i>Trypanosomiasis</i>	81
Nematodes	82
Infections that cross the species barrier	82
Complications of bacterial infections and antibiotic use in animals	82
Transmissible spongiform encephalopathies (TSEs)	83
Inter-species transfer of prions	83
Scrapie	83
Bovine spongiform encephalopathy	84
<i>Epidemiology of BSE</i>	84
<i>Biomarkers in the urine of BSE infected cattle</i>	85
<i>Human health implications of BSE</i>	86
<i>Breeding animals protected against BSE</i>	86
TSE research	86
<i>Prion gene haplotyping</i>	86
<i>Pharmacological approaches to TSE research</i>	87
<i>Molecular diagnostic approach to TSE research</i>	87
<i>RNAi for knockdown of the bovine prion gene</i>	87
Chronic wasting disease	88
<i>Chronic wasting disease in wildlife</i>	88
<i>Chronic wasting disease of the cattle in Sudan</i>	89
<i>Chronic wasting in dairy cows in the Netherlands</i>	89
Genetic disorders in farm animals	90
Genetic predisposition to acquired diseases in animals	90
Diseases of pet animals	90
Canine anemia	90
Cardiovascular disease	91
<i>Heart failure</i>	91
<i>Cardiac complications of canine babesiosis</i>	91
Diabetes	92
<i>Role of biotechnology in management of diabetes</i>	92
Arthritis	92
Cancer in cats and dogs	93
<i>Cancer clinical trials in dogs</i>	93
<i>Canine Comparative Oncology Genomics Consortium</i>	94
Preventive veterinary medicine	94
Prevention of introduction of foreign animal diseases	95
Producing transgenic cattle resistant to BSE	95
Zoonotic diseases	95
Viruses that emerge in animals and spread to humans	96
Collaborative management of animal and human health	96
Vaccines for zoonotic viral diseases	96
4. Molecular Diagnostics in Animals	99
Introduction	99
Nucleic acid technologies	99
The polymerase chain reaction	99
<i>Basic Principles of PCR</i>	99
<i>Target selection</i>	100
<i>Detection of amplified DNA</i>	100
<i>Real-time PCR systems</i>	100
<i>LightCycler PCR system</i>	101
<i>Molecular beacons</i>	101
<i>Applications of PCR in veterinary medicine</i>	101
Fluorescent in situ hybridization	102
Immunodiagnosics	104
Enzyme-linked immunoassays	104
Bovine Gamma Interferon Test	104
Antigen diagnosis of trichinosis	105
Parachek™ for the diagnosis of Johne's disease	105
Antibodies for differentiation between vaccinated and infected animals	106

Biochip/microarray technology.....	106
Applications of microarrays in animal biotechnology	107
<i>Cattlearray3800 for functional genomics</i>	<i>107</i>
<i>eSensor™ electrochemical biochip</i>	<i>108</i>
<i>FR 48 microfluidic biochip.....</i>	<i>108</i>
Biosensors	108
Immunosensors	109
<i>Biosensor for ovulation prediction in dairy cows</i>	<i>109</i>
Flow cytometry for animal diagnostics	110
Molecular imaging in animals.....	110
Veterinary cytogenetics	111
Applications of molecular diagnostics in animals	112
Canine DNA testing	112
Diagnostic aids to selective breeding	112
<i>Selection of desirable traits</i>	<i>112</i>
<i>Gene variations and fat content of beef.....</i>	<i>113</i>
<i>Using genetic markers for improved milk production in dairy cattle</i>	<i>114</i>
<i>Application of bovine genomics for improving milk yield</i>	<i>114</i>
<i>Recognition of hereditary syndromes</i>	<i>114</i>
Genetic markers in animals	115
<i>SNP genotyping in animals</i>	<i>115</i>
<i>SNP genotyping for selective breeding of chicken</i>	<i>115</i>
Animal identity and parentage analysis	116
Animal species identification in food	116
Diagnosis of infections	117
<i>Bacterial infections</i>	<i>117</i>
<i>Diagnosis of viral infections</i>	<i>117</i>
<i>Molecular diagnosis of avian influenza.....</i>	<i>119</i>
<i>Molecular diagnosis of swine influenza</i>	<i>120</i>
<i>Diagnosis of parasitic infections</i>	<i>120</i>
<i>Detection of natural or bioterror threats to livestock.....</i>	<i>121</i>
Molecular diagnosis of prion diseases.....	121
<i>Bovine spongiform encephalopathy</i>	<i>121</i>
<i>Testing for BSE in living animals</i>	<i>123</i>
<i>Prions in urine</i>	<i>123</i>
<i>Diagnosis of chronic wasting disease in wildlife</i>	<i>124</i>
Developing new tests for prion diseases.....	124
<i>Differentiation among various types of TSEs.....</i>	<i>124</i>
<i>Protein cyclic amplification</i>	<i>124</i>
<i>Antibody tests for prion diseases.....</i>	<i>125</i>
<i>Scrapie genotyping.....</i>	<i>125</i>
<i>A real-time ultrasonic method for prion protein detection</i>	<i>126</i>
Companies involved in developing molecular diagnostics for TSEs	126
Diagnosis of genetic disorders	127
<i>Genetic screening of companion animals</i>	<i>127</i>
<i>Genes associated with exercise-induced collapse.....</i>	<i>127</i>
<i>Preimplantation genetic diagnosis</i>	<i>127</i>
Diagnosis of cancer in animals	128
<i>Diagnosis of skin cancer.....</i>	<i>128</i>
Diagnosis of food-borne pathogens	128
Introduction	128
Molecular diagnostic methods used in food-borne infections	129
Limitations of use of molecular probes in food analysis	130
Companies with technologies for food pathogen detection	130
Biotechnology-based novel diagnostics for aquatic animals.....	131
Detection of chemicals in foods of animal origin	131
Companies developing molecular diagnostics for animals.....	132
5. Biotechnology-based Veterinary Medicine	135
Introduction.....	135
Biotechnology versus pharmaceutical products	135
Role of biotechnology in drug discovery and development	136
Cost of veterinary vs. human drug discovery and development	136
Advantages and disadvantages of testing biotech products in animal models	137
Biotechnolgy-based antiparasitic drugs	137
Non-antibiotic strategies for control of infections in animals	137
Probiotics.....	138
<i>Potential role for probiotics in the human gut</i>	<i>138</i>
<i>Potential role for probiotics in animals</i>	<i>138</i>
<i>Probiotic bacteria for control of pathogens in cattle</i>	<i>138</i>
Nonantibiotic drugs for infections in animals	139

<i>Immunomodulation as an alternative to antibiotics in infections</i>	140
<i>Cathelicidins: effector molecules of mammalian innate immunity</i>	140
<i>Bacteriophage therapy for antibiotic resistance</i>	140
Biotechnology for treating tendon injuries	141
Use of growth factors to facilitate tendon injuries	141
Productivity enhancers	141
Bovine somatotropin for increasing milk production in dairy cows	142
Increasing milk production in cows by feeding propionibacteria	143
Use of growth factors	143
Transgenic plant products for use in animals	143
Biotechnology-based vaccines	144
Modern vaccines without viral non-structural proteins	144
Plant-derived vaccines for use in animals	145
Nano-bead vaccine adjuvant	146
Genetically engineered vaccines	146
<i>Application of nucleic acid vaccines in veterinary medicine</i>	146
<i>DNA vaccines</i>	146
<i>DNA vaccine for tuberculosis</i>	148
<i>DNA vaccines for West Nile encephalitis</i>	149
<i>Gene-based vaccine for Marek's disease</i>	149
<i>Genetic engineering of live rabies vaccines</i>	150
<i>Genetically engineered vaccines for equine encephalitis</i>	150
<i>Genetically engineered vaccines for Johne's disease</i>	151
<i>Vaccines against avian influenza</i>	151
<i>Vaccines against parasitic infections</i>	152
Recombinant marker vaccines	152
<i>Marker vaccines for foot-and-mouth disease</i>	153
<i>Marker vaccine for Newcastle disease</i>	153
<i>Vaccines for classical swine fever</i>	154
Vaccines for tick control	154
Vaccination to protect swine from H1N1 influenza virus infection	154
Vaccination of cattle to prevent <i>E. coli</i> transmission to consumers in meat	155
Vaccines for bacterial equine respiratory infections	155
Using RNAi to develop vaccines for viral infections in prawns	156
Companies developing biotechnology-based vaccines	156
Biotechnology in treatment of parasitic infections	156
Biotechnology in the treatment of CNS injuries in pet animals	157
Paraplegia due to acute spinal cord injury in dogs	157
RNAi for suppression prions in livestock	158
Cell Therapy	158
Umbilical cord blood stem cells	158
Application of stem cells in veterinary medicine	158
<i>Use of stem cells to repair tendon injuries in horses</i>	159
<i>Stem cells for spinal cord injury in dogs</i>	159
Gene therapy	160
<i>Gene therapy vectors</i>	160
<i>Gene therapy by mitochondrial transfer</i>	160
<i>In utero gene therapy</i>	161
Applications of gene therapy in veterinary medicine	161
<i>Gene therapy for mucopolysaccharidosis VII in dogs</i>	161
<i>Gene therapy to increase disease resistance</i>	162
<i>Gene therapy for infections</i>	162
<i>Gene therapy for hematological disorders</i>	163
<i>Gene therapy for cardiomyopathy in dogs</i>	163
<i>Gene therapy for endocrine disorders</i>	164
<i>Gene therapy for arthritis</i>	164
<i>Gene therapy for renal failure</i>	164
Cancer gene therapy	164
<i>Antiangiogenic cancer gene therapy in dogs</i>	165
<i>Brain tumors in cats and dogs</i>	165
<i>Breast cancer in dogs</i>	166
<i>Canine hemangiosarcoma</i>	167
<i>Canine melanoma</i>	167
<i>Canine soft tissue sarcoma</i>	168
<i>Melanoma in horses</i>	168
6. Research in Animal Biotechnology	169
Introduction	169
Research institutes	169
Animal and Natural Resources Institute (USDA)	169
Center for Animal Biotechnology at University of Melbourne (Australia)	170

CSIRO Livestock Industries	171
Easter Bush Research Consortium	172
Danish Veterinary Institute	172
Friedrich-Loeffler-Institute	173
Indian Veterinary Research Institute	173
Institute for Animal Health of UK.....	174
Kimron Veterinary Institute	174
Korean National Livestock Research Institute.....	175
National Agricultural & Veterinary Biotechnology Center of Ireland	175
Swiss Federal Institute of Technology	176
Veterinary Laboratories Agency of UK.....	176
Veterinary Medical University of Vienna	177
Ethical issues of research in animal biotechnology	177
Future prospects	178
Strategies for control of twining in cattle	178
Future developments of molecular diagnostics	178
Future of vaccine application in veterinary medicine	179
<i>Promotion of innate immunity in animals</i>	<i>179</i>
<i>Identification of key parasite antigens for eliciting immune response</i>	<i>179</i>
<i>Virus-like particle vaccines for lasting immune response</i>	<i>180</i>
Control of respiratory virus infections	180
Control and prevention of bioterrorism diseases in animals	180
Genetic control of disease resistance	181
<i>Production of cattle lacking prion protein.....</i>	<i>181</i>
Application of genetics and biotechnology to wildlife management.....	181
Future of animal genomics	182
Future prospects of in vitro meat production	182
7. Animal Biotechnology Markets.....	185
Introduction.....	185
Markets for biotechnology-based products for animal healthcare.....	186
Markets for biopharmaceuticals for animals	187
<i>Markets for recombinant proteins for animal healthcare</i>	<i>187</i>
<i>Markets for vaccines for animals</i>	<i>188</i>
Markets for animal diagnostics.....	188
<i>Test for bovine spongiform encephalopathy.....</i>	<i>188</i>
Animal biotechnology markets according to therapeutic areas	189
Markets for biotechnology-based animal products for humans	189
Transgenic proteins	190
Market for xenotransplantation	190
Strategies for promoting use of animal biotechnology.....	191
Financial losses from death and disease in animals.....	191
<i>Losses in farm animals</i>	<i>191</i>
<i>Losses in poultry.....</i>	<i>191</i>
<i>Losses in equine industry</i>	<i>191</i>
The emerging role of pet owners.....	191
Improvement in cattle through application of biotechnology	192
<i>Economic aspects of genomic evaluation of dairy cattle.....</i>	<i>192</i>
<i>Pig market</i>	<i>192</i>
<i>Cattle Market.....</i>	<i>193</i>
<i>Poultry market.....</i>	<i>193</i>
<i>Milk from genetically modified cows.....</i>	<i>193</i>
Transgenic fish	194
Role of biotechnology in livestock performance enhancer market.....	194
Gene transfer technologies.....	194
In vitro meat production and animal biotechnology markets	194
Cost-benefit aspects of transgenic proteins	194
<i>Lower costs of transgenic production</i>	<i>194</i>
<i>Lower costs of treatment</i>	<i>195</i>
Unmet needs in animal biotechnology	195
Future opportunities for biotechnology in animal healthcare	196
Farm animals	196
<i>Global trends in epidemiology of livestock diseases</i>	<i>197</i>
Companion animals	197
Animal molecular diagnostic markets.....	197
8. Regulatory issues	199
Introduction.....	199
Regulatory agencies for veterinary biotechnology in the US	199
FDA regulatory issues in agricultural biotechnology	200
FDA guidelines on use of antibiotics in food-producing animals	201

Food safety evaluation of transgenic animals	202
Food from cloned animals	203
FDA investigation of drug transfer into eggs.....	204
Animal feed safety	205
Medicated feeds.....	205
Regulatory issues for production of transgenic proteins	206
Risks of animal biotechnology	206
FDA regulation of bovine products	207
Worldwide biotechnology regulatory and trade issues.....	207
9. Companies Involved in Animal Biotechnology.....	209
Introduction.....	209
Biotechnology at top veterinary pharmaceutical companies	209
Profiles of selected companies.....	209
Collaborations.....	327
10. References.....	331
