

TABLE OF CONTENTS

0. Executive Summary	10
1. Introduction	12
Definitions	12
Historical evolution of cytogenetics	12
Scope of cytogenetics	13
Molecular cytogenetics	14
Basics of molecular biology relevant to cytogenetics	14
DNA	14
RNA	15
DNA transcription.....	15
Chromosomes	15
Mitochondrial DNA.....	16
Genes.....	16
<i>The genetic code.....</i>	<i>16</i>
<i>Gene expression</i>	<i>17</i>
The human genome	17
Variations in the human genome.....	18
<i>Variations in DNA sequences</i>	<i>18</i>
<i>Single nucleotide polymorphisms</i>	<i>18</i>
<i>Copy number variations in the human genome</i>	<i>18</i>
<i>Genotype and haplotypes.....</i>	<i>20</i>
<i>Complex chromosomal rearrangements</i>	<i>20</i>
<i>Insertions and deletions in the human genome.....</i>	<i>20</i>
<i>Large scale variation in human genome</i>	<i>21</i>
<i>Structural variations in the human genome</i>	<i>21</i>
<i>Replication of the DNA helix</i>	<i>22</i>
<i>Transposons</i>	<i>22</i>
Mapping and sequencing of structural variation from human genomes.....	23
2. Technologies used for cytogenetics	24
Introduction.....	24
Quantitative fluorescent polymerase chain reaction	24
RNA interference and cytogenetics	25
RNA-induced transcriptional silencing complex.....	25
Single cell genetics by siRNA ablation	25
RNAi and cancer cytogenetics	26
Role of miRNAs in cancer cytogenetics.....	26
Preimplantation genetic diagnosis	26
Preimplantation genetic haplotyping	27
Bioinformatics and cytogenetics	27
FISH probe design software.....	27
LS-CAP algorithm.....	28
Distance-based clustering of CGH data	28
3. Fluorescent In Situ Hybridization	30
Introduction.....	30
Innovative FISH technologies	32
Direct visual in situ hybridization	32
Direct labeled Satellite FISH probes.....	32
Chromogenic in situ hybridization (CISH)	32
Primed in situ labeling	33
Interphase FISH	33
FISH with telomere-specific probes	34
High-throughput quantitative FISH.....	34
Multicolor FISH	35
<i>Multicolor chromosome banding</i>	<i>35</i>
Fiber FISH.....	35
Use of peptide nucleic acid with FISH	35
RNA-FISH	37
Use of locked nucleic acids with FISH	37
Automation of FISH.....	37
Single copy FISH probes	38
peT-FISH™	38
In vivo FISH	39
Applications of FISH	39
Companies involved in FISH diagnostics	40

4. Genomic Technologies relevant to Cytogenetics	42
Introduction.....	42
Microarrays/biochips for cytogenetics	42
Tissue microarrays	42
Chromosome copy number analysis	42
Combination of FISH and gene chips	43
Combination of CGH+SNP microarrays	43
SignatureChip®	43
Molecular Combing	44
High density oligonucleotide arrays	44
Next Generation Screening®.....	45
Comparative genomic hybridization	45
Array-based comparative genomic hybridization	47
aCGH vs karyotyping	47
Comparison of array CGH and multipoint FISH.....	48
Combined use of tissue microarrays and aCGH	48
Single-cell array CGH	48
Regulatory requirements for array CGH	49
Future prospects of aCGH	49
Whole genome expression microarrays	50
Life Technologies Expression Array System	50
Arrayit's® H25K	51
Optical Mapping	51
Single cell cytogenetics.....	52
Single cell PCR.....	52
<i>LATE-PCR.....</i>	<i>52</i>
<i>AmpliGrid-System.....</i>	<i>52</i>
<i>Digital Counting.....</i>	<i>52</i>
Analysis of single-cell gene expression.....	53
Application of single cell cytogenetics in preimplantation genetic testing	53
Direct molecular analysis without amplification	54
5. Molecular Imaging & Single Molecular Detection	56
Molecular imaging.....	56
Companies involved in molecular imaging	56
Single molecule detection	57
Spectrally resolved fluorescence lifetime imaging microscopy	57
Single-molecule fluorescence resonance energy transfer	58
Confocal laser scanning	58
Single Molecule Array	58
PCR systems for single molecule detection	59
<i>Real-time PCR</i>	<i>59</i>
<i>Digital PCR</i>	<i>59</i>
<i>Emulsion PCR</i>	<i>60</i>
Rolling circle amplification technology	60
Microfluidic assay for protein expression at the single molecule level	60
Bioinformatic and single molecule detection	61
6. Role of Nanobiotechnology in Cytogenetics	62
Introduction.....	62
Nanobiology and the cell.....	62
Visualization on nanoscale	63
Application of AFM for biomolecular imaging	63
<i>Future insights into biomolecular processes by AFM.....</i>	<i>63</i>
<i>Use of AFM for microdissection of chromosomes</i>	<i>64</i>
Scanning probe microscopy	64
Near-field scanning optical microscopy	64
Multiple single-molecule fluorescence microscopy.....	65
Nanoscale scanning electron microscopy	65
Nanotechnology-based FISH.....	65
<i>Study of chromosomes by atomic force microscopy.....</i>	<i>65</i>
<i>Quantum dot FISH</i>	<i>65</i>
Nanobiotechnology for single molecule detection.....	66
<i>Nanolaser spectroscopy for detection of cancer in single cells</i>	<i>67</i>
<i>Carbon nanotube transistors for genetic screening</i>	<i>67</i>
<i>Quantum-dots-FRET nanosensors for single molecule detection</i>	<i>68</i>
<i>3D single-molecular imaging by nanotechnology.....</i>	<i>68</i>
<i>Manipulation of DNA sequence by use of nanoparticles</i>	<i>68</i>
Nanofluidic/nanoarray devices to detect a single molecule of DNA	68
Nanopore technology.....	69
Portable nanocantilever system for diagnosis.....	69

Nanobiosensors	70
7. Biomarkers and Cytogenetics	72
Introduction.....	72
Definitions	72
Biomarkers and cytogenetics	72
Cancer biomarkers	72
Technologies for detection of cancer biomarkers	73
Telomerase as a biomarker of cancer	73
Digital karyotyping for cancer biomarkers	73
Optical systems for in vivo molecular imaging of cancer	74
Circulating cancer cells in blood as biomarkers of cancer	74
Array CGH for biomarker discovery in cancer	75
Genetic biomarkers	75
8. Applications of Cytogenetics.....	76
Introduction.....	76
Applications of cytogenetics in research	76
Cytogenetics of embryonic stem cells	76
Genetic disorders	77
Technologies for diagnosis of genetic disorders	77
<i>Cytogenetic microarrays for diagnosis of mental retardation</i>	<i>77</i>
<i>Detection of copy number variations in genetic disorders</i>	<i>78</i>
<i>Detection of non-recurrent DNA rearrangements by aCGH.....</i>	<i>78</i>
<i>Quantitative fluorescent PCR</i>	<i>79</i>
<i>Representational oligonucleotide microarray analysis.....</i>	<i>79</i>
<i>SignatureChip®-based diagnostics for cytogenetic abnormalities</i>	<i>79</i>
<i>Screening for cytogenetic abnormalities</i>	<i>80</i>
Cytogenetics in prenatal diagnosis	80
<i>aCGH for prenatal diagnosis</i>	<i>80</i>
<i>BAC HD Scan test</i>	<i>81</i>
<i>FISH for prenatal diagnosis</i>	<i>81</i>
<i>PCR for prenatal diagnosis of trisomy 21</i>	<i>81</i>
<i>Plasma DNA sequencing to detect fetal chromosomal aneuploidies</i>	<i>82</i>
<i>Concluding remarks and future prospects of prenatal diagnosis.....</i>	<i>82</i>
Cytogenetics in preimplantation genetic diagnosis	83
<i>Array CGH for PGD.....</i>	<i>83</i>
<i>Fluorescent PCR for PGD</i>	<i>83</i>
<i>FISH for PGD.....</i>	<i>84</i>
<i>PGD using whole genome amplification</i>	<i>84</i>
Conditions detected by preimplantation cytogenetic diagnosis	85
The future of preimplantation genetic diagnosis	85
Disorders of the nervous system.....	86
Application of cytogenetics in epilepsy	86
Neuropsychiatric disorders in children.....	86
Cardiovascular disorders	87
Infections	87
PNA-FISH for diagnosis of infections	87
Diagnosis of bacterial infections at single molecule level	88
Detection of single virus particles.....	88
Role of cytogenetics in drug discovery and development.....	89
Role of cytogenetics in the development of personalized medicine.....	89
Relation of cytogenetics to personalized medicine	89
Cytomics as a basis for personalized medicine	90
Molecular imaging and personalized medicine	91
Cytogenetics for gender determination	91
<i>Gender determination in competitive sport</i>	<i>91</i>
<i>Gender determination in forensic cases.....</i>	<i>92</i>
Regulatory aspects of FISH.....	92
9. Cancer Cytogenetics	94
Cancer genetics	94
Cytogenetic abnormalities in cancer	94
Cytogenetic technologies for molecular diagnosis of cancer	94
Applications of aCGH in oncology	95
Cytogenetics of tumor cells in body fluids.....	96
Cytogenetics and microRNAs	96
Gene expression profiles predict chromosomal instability in tumors	96
Loss of heterozygosity	97
Molecular Combing for cancer diagnosis	97
Mutation detection at molecular level	98

Proteomic identification of oncogenic chromosomal translocation partners.....	98
Tissue microarrays for cancer diagnosis	99
Applications of cytogenetics in molecular diagnosis of cancer	99
Molecular cytogenetics in hematological malignancies.....	99
<i>Chromosome translocations in leukemias</i>	100
<i>Cytogenetics diagnostics for leukemia</i>	100
<i>Detection of p53 deletions in chronic lymphocytic leukemia</i>	101
<i>Cytogenetics of lymphomas</i>	101
<i>Cytogenetics of myelodysplastic syndrome</i>	102
<i>Cytogenetics of plasma cell myeloma</i>	103
Bladder cancer.....	103
Bone and soft tissue tumors	103
Brain tumors	104
Breast cancer	105
<i>Chromosomal aberrations in breast carcinomas</i>	105
<i>FISH vs CISH and SISH for determining of HER-2/neu amplification</i>	105
<i>Genomic profiles of breast cancer</i>	106
Colorectal cancer	106
Lung cancer	107
Ovarian cancer	108
<i>aCGH analyses of cisplatin-resistant ovarian cancer cells</i>	108
Prostate cancer.....	108
Renal cancer	109
Thyroid cancer.....	109
Cytogenetics-based anticancer strategies.....	110
aCGH-based strategies for targeting cancer pathways	110
Allele-specific inhibition.....	110
Prognostic and therapeutic significance of gene amplifications	110
RNAi-based approach for leukemia.....	111
Significance of double minutes.....	111
Online resources for cancer cytogenetics.....	111
The Cancer Genome Atlas	112
Concluding remarks on cancer cytogenetics	112
10. Cytogenetics Markets.....	114
Introduction.....	114
Methods for study of cytogenetic markets	114
Cytogenetic markets according to technologies	114
Market for FISH technologies.....	115
Array CGH markets	115
Sorting the markets of overlapping technologies	116
Markets for cytogenetics according to therapeutic areas	116
Geographical distribution of markets for cytogenetics.....	118
SWOT of competing technologies.....	118
Unfulfilled needs	119
Limitations of current technologies.....	121
Promising future developments in cytogenetics	121
Commercial aspects of genome sequencing technologies	121
<i>Cost of genotyping</i>	121
11. Companies	124
Profiles of companies.....	124
Collaborations.....	208
12. References.....	212
